

Application

ENEP-3W-7620

It is widely used for mobile lighting in inflammable and explosive places as well as railway, electric power, gold treatment, petrochemical, oil field fire protection, railway and other industries.

Product features

- 1.Solid-state maintenance-free LED light source, high luminous efficiency, good light gathering;
- 2.With strong light, working light, strobe three kinds of light design, press the button to convert;
- 3.Humanized power indicator and low voltage warning function design, you can check the battery power at any time; When the battery is low, the lamp will automatically prompt charging;
- 4.Made of light alloy, resistant to strong impact, high and low temperature resistance, waterproof and dustproof, can be used in various harsh environments;
- 5.It has the functions of low-power warning and automatic low-power protection. When the lamp is in low power, it will flash automatically and prompt charging. If continue to use, the lamp will be automatically protected and stop working in a short time.
- 6.Compact structure, small size, light weight, can be carried in the pocket.

Technical parameters

ENEP-3W-7620	
Power	3W
Rated voltage	DC3.7V
Rated capacity	2200mAh
Ex-mark	Ex Ib IIC T4 Gb
LED chip	CREE
Working mode	Strong light, working light, flashing
Discharge time	8 hours (strong light), 12 hours (working light)
Charging time	7-8 hours
Irradiation distance	200m
Ambient temp	-20℃~50℃
IP Rating	IP68
