

Application

It is widely used for mobile lighting in inflammable and explosive places as well as railway, electric power, gold treatment, petrochemical, oil field fire protection, railway and other industries.

Product features

ENEP-10W-7102

- 1.Solid-state maintenance-free LED light source, high luminous efficiency, good light gathering;
- 2.With strong light, working light, strobe three kinds of light design, press the button to convert;
- 3.Humanized power indicator and low voltage warning function design, you can check the battery power at any time; When the battery is low, the lamp will automatically prompt charging;
- 4.The shell is made of high hardness alloy material, with the ability to resist strong impact and impact. Resistant to high and low temperature, waterproof and dustproof, it can be used in various harsh environments and climatic conditions;
- 5.Beautiful appearance, small size, light weight, can be carried by hand or shoulder, easy to carry.

Technical parameters

ENEP-10W-7102	
Power	10W
Rated voltage	DC11.1V
Rated capacity	6600mAh
Ex-mark	Ex IA IIC T6 Gb
LED chip	CREE
Working mode	Strong light, working light, flashing
Discharge time	8 hours (strong light), 12 hours (working light)
Charging time	7-8 hours
Irradiation distance	500m
Ambient temp	-20℃~50℃
IP Rating	IP68
